

# Wherever Seconds Count

## There You'll Find Hamiltons on Duty

**T**RAIN dispatching is a serious business. Literally, every fraction of time is taken into account in arranging and carrying out intricate schedules. That is why train dispatchers work with their accurate timepieces before them, jotting down every train movement with the maximum of precision.

Dispatchers W. O. Litten, of Rock Island, Illinois, and B. J. Donahue, of Des Moines, Iowa, time their trains with Hamiltons. Dispatcher Litten has used his Hamilton since 1899—three years before he became a train dispatcher for the Rock Island Lines. Dispatcher Donahue has carried his Hamilton since 1902 and has been a dispatcher for the Rock Island eleven years.

It is significant that wherever accurate time is needed—in engine cab, coach, or at the dispatcher's desk—there you'll find Hamilton to be the favorite watch. And this is because railroad men have tried and proved the Hamilton in actual service. It has stood the test and proved to be the most dependably accurate watch in general railroad use.

Ask your jeweler to show you the new Hamilton 992 railroad

model. This watch, with its rugged, dust-proof case of filled gold, is built to render dependable, accurate time service. It combines the famous Hamilton 992 movement with a case specially designed for it. When you select a Hamilton 992 as your watch you at once insure yourself time satisfaction and economical time service.

*Send for a copy of our new Hamilton time book. We are glad to send a copy to any railroad man asking for it.*
