DEARBORN TREATMENT is adjusted to correct actual present tendencies of locomotive boiler waters shown by analyses made from time to time.

DEARBORN TREATMENT is applied through engine tender, or direct to boiler, or by means of a DEARBORN Feeder to the wayside tank. Application adapted to suit conditions.

Frisko Protects Its Employees

Frisko is careful about the wiping rags that it puts in the hands of its employes. No chance can be taken with allowing minor scratches to become infected.

That's the reason Frisko uses KLEEN KWALITY KLOTHS, only. These wipers are not only clean, but their special treatment makes them as sanitary as hospital gauze—and they are lintless as well.
