Spring Bands
That Are Effecting Large Savings

RAILROADS using our STANFAST spring bands report a saving over the cost of manufacturing wrought iron bands in their own shops. Wrought iron bands crease in the corners; the iron is burnt in forging; they are not uniform in thickness, and there is considerable loss due to imperfect welds. STANFAST bands have solid corners, are free from burning, are of uniform thickness, and require no welding. The strength of these bands compare as follows:

| | Tensile Strength | Elastic Limit |
|---------------------|------------------|-----------------|
| | lb. per sq. in. | lb. per sq. in. |
| Wrought Iron Bands— | 40,000 | 25,000 |
| STANFAST Bands— | 70,000 | 36,000 |

We can effect a saving in manufacturing cost and insure long wearing bands that are free from failures.
