THE VARNISH THAT LASTS LONGEST

Made By MURPHY VARNISH COMPANY

HIPOWER

(Reg. U. S. Pat. Off.)

NUT LOCKS

PATENTED

The "double kink" in HIPOWER Nut Locks has FOUR to FIFTEEN times more Spring than the old style Plain Spiral.

This pressure is necessary to force splice bars continually to place. In doing this, HIPOWER naturally react, cushioning each bolt against the blows of traffic, and additionally making each bolt of joint carry its share of load.

On new rail HIPOWER Nut Locks should be tightened frequently until angle bars have worn to a true bearing. After that the bolts will require little further attention.

If further information is desired, address

The National Lock Washer Company
Newark, N. J. - - - Chicago, Ill.

Firebox Facts

1. Big locomotives have long wheel bases.
2. Long wheel bases must be covered by long boilers.
3. Long boilers mean excessive flue lengths.
4. Excessive flue lengths represent investment in heating surfaces of low evaporative values.
5. Shorter flues mean longer fire boxes.
6. Longer fire boxes (with combustion chambers) of the radial stay type are dangerous and introduce added stay bolt troubles.
7. The Jacobs-Shupert sectional fire box (and combustion chamber when required) supplies the means for designing locomotive boilers of correct economic proportions and at the same time for reducing maintenance problems to a minimum.

Do You Believe In

PREPAREDNESS?

Bismarck, the famous German statesman, once said:

"It is cheaper to support an army for twenty years than to suffer a single defeat."

A prominent Frisco employee recently said:

"It is cheaper to carry accident insurance in the Continental Casualty Company for twenty years than to suffer one serious injury without insurance."

Be PREPARED With a Continental Policy

WE PAID MONEY DURING 1915 TO 50,000 PEOPLE.
